

Prof. Qifeng Zhou

## Congratulation for 40<sup>th</sup> Anniversary

On the occasion of the 40<sup>th</sup> Anniversary of the Polymer Society of Korea (PSK), I would like to extend, on behalf of Polymer Division of Chinese Chemical Society (PDCCS), and in my own name, congratulations on the impressive growth of PSK in the past four decades since 1976.

The contributions made by PSK in academic and industrial fields in Korea are monumental. We believe PSK will continue to take a leading role in the above fields and greatly benefit the development of Korean society in general as well. Also, PSK has been actively involved in international cooperations with many foreign polymer societies including PDCCS. The society is playing a key role in the Federation of Asian Polymer Societies (FAPS).

We wish the Polymer Society of Korea a persistent successful development in future.

**Qifeng Zhou**

President of PDCCS

Professor and formal President of Peking University

Vice-President of IUPAC
