

Prof. Eric J. Amis

Congratulation for 40th Anniversary

Please accept the warmest congratulations from The University of Akron on celebration of the 40th Anniversary of the Polymer Society of Korea.

Since 1976, The Polymer Society of Korea has promoted polymer science and the polymer industry worldwide, continually expanding over decades to provide leadership as a resource in the development and propagation of the science and technology of polymer-related chemistry, physics, biology and engineering. Through networking, education opportunities, professional development and recognition, the Polymer Society of Korea connects its many members as they grow as researchers and professionals.

As the Dean of the College of Polymer Science and Polymer Engineering at The University of Akron, I am deeply thankful for your exemplary commitment to the advancement of polymer science and technology. Numerous alumni of our college find great value and take pride as members of your organization and we are appreciative of the continuing partnership to advance the value of polymer science and engineering.

Congratulations again on 40 years of contributions to furthering the continued growth of polymers throughout the world. Best wishes for many more years of success.

Eric J. Amis

Dean, College of Polymer Science and Polymer Engineering
Vice Provost, Research
