**Datuk ChM Dr Soon
Ting Kueh**
President
Institut Kimia Malaysia

On behalf of Institut Kimia Malaysia, or IKM, I would like to congratulate the Polymer Society of Korea (PSK) on 50 years of contributions to polymer science and engineering in Korea.

IKM, established in 1967, is a professional scientific organisation for regulating the practice of chemistry and advancing chemical sciences in Malaysia. Polymer and materials science and technology are a key component in our efforts to advance science and technology in Malaysia. For the last 59 years, we have been working closely with other scientific organisations in the region, including the Polymer Society of Korea (PSK), in our joint effort in advancing polymer science and technology in the region. In a Memorandum of Understanding (MoU) signed between IKM and PSK in 2025, we go further in collaborating our efforts in including polymer education, research and publications.

I believe that this 50th-anniversary celebration signifies a significant milestone in PSK's contributions to polymer science and engineering, particularly in Korea. We join you in celebrating these achievements and wish you continued success.

Thank you and with best wishes.

Datuk ChM Dr Soon Ting Kueh
President, Institut Kimia Malaysia
