Young-Chang Joo
President
Materials Research
Society

Dear Colleagues and Friends of the Polymer Society of Korea.

It is my pleasure to convey the following resolution from the MRS Board of Directors:

I congratulate the Polymer Society of Korea on the momentous occasion of your 50th anniversary. For half a century, the Society has been a cornerstone of polymer science and engineering in Korea, making profound contributions to the nation's materials research enterprise and helping to elevate Korea's standing in the global research community. Your sustained commitment to excellence has nurtured generations of scientists and engineers, fostered fruitful academia-industry partnerships, and translated fundamental discoveries into technologies that benefit society.

The Polymer Society of Korea has not only strengthened Korea's domestic research ecosystem but has also played a leading role internationally, driving collaborations, disseminating cutting-edge knowledge, and shaping the direction of polymer research worldwide. The IUPAC-PSK50 International Conference will be a fitting celebration of these achievements and an excellent platform for sharing new ideas, forging partnerships, and inspiring the next generation of innovators. We at the Materials Research Society greatly value our relationship with PSK and look forward to deepening collaborations serving our members and advancing the scientific and engineering community.

On behalf of the Materials Research Society, I extend my heartfelt congratulations and best wishes for a successful IUPAC-PSK50 conference and for continued leadership in research, education, and innovation. May the Polymer Society of Korea continue to flourish and to lead transformative advances that address global challenges in health, sustainability, and technology.

Yours sincerely,

Young-Chang Joo
President, Materials Research Society
